Historia natural del herpes simple. Historia natural del herpes zoster. Historia natural del herpes genital. Historia natural del herpes labial.

Secondary prevention

Detection: Perform interrogation at the time of consultation, on condition of any type of cancer, HIV, if the vaccine against varicella was applied, at what age, suffering from chickenpox, between Others.

Diagnosis: Herpes Zoster confirmed, through physical and cytodiagnostic examination.

Treatment: According to the protocols established in the technical and administrative standards of attention.

20. The study employed neonate data inscribed in two parenteral acyclovir study for the treatment of neonatal HSV disease, carried out between 1981 and 1997. Disability

Chronic dermatitis

14. Previously, numerous studies have reported that the early institution of antiviral therapy is beneficial for the results of the disease. Based on these background, a study conducted by American researchers aimed at the update HSV Disease Neonatal P ARA to identify the means through which future improvements were achieved in the management of neonates infected with HSV. Interventional strategies

23. Disease

Herpes Zoster

13. A total of 186 patients were selected, all of them treated with acyclovir. Nervous)

Skin secondary bacterial infections

Recurrence of herpes Zoster

Temporary or permanent nerve paralysis.

blindness

Ramsay Hund Syndrome (ParÁfÁi facial lysis, loss of the audition, loss of taste in half of the tongue, skin injuries).

15. Surveillance in Public Health

Search for people with whom I have had Contact The patient, before being isolated due to his illness.

Contact people with risk factors such as: Chickenpox background, immunodepresses due to diseases (HIV, cache, drug addiction) or age advanced; To give them advice on how to avoid the apparel of the /> 22. SUCCESTABILITY

Adults older than 60 years.

Situation of severe string.

Depression of the immunological system because of massive infections.

Disease ImmunoDepression:

Cancer 8. HostPed

After the chickenpox The virus may be latent and not to manifest symptoms until a vulnerability occurs in the individual over all in advanced ages .

7. Of all the patients evaluated, 40% suffering from scalp fetal monitoring during childbirth. Agent

Varicel Virus Zoster (Virus VZ), member of the Herpesvirus group, which is part of the DNA virus family and of which there is a single serotype.

5. Drug addiction < / li> Pathogenic period

11. During the two degree, effective antiviral therapies have been available for neonatal herpes virus (HSV) virus disease, al Same time several changes have been documented not on the results of infected infants, but also in the natural history of the disease. Environment

Incomplete vaccination scheme.

Lack of information on the transmission of the virus.

Non-healthy lifestyles.

Little Covenure in Health.

6. Signs And symptoms

Intense pain

Sensation of punishes

Eruptions on the skin

Fever

Chills

Inflammation of lymph nodes

Joint pain

Anomalies in the taste

Affections in the vision, lost of the myving of the eye

12. In this state it is asymptomatic and becomes inactive for the body. Decrease the causative agent: Apply the vaccine against varicella to recreasons, sequesta and intervention of cases of herpes zoster.

Interrupt contact HuÁfÁ © Sped Agent: for example, isolation immediate person with VZ to avoid sick contact Á é à "Healthy, for health personnel put on Biosecurity rules.

24. Modify the environmental factors: Expand health care coverage, place the virus vaccine to the recliner, perform campaigns of Sensitization in order for people to go to the hallmark centers. Both studies reported the demographic and clinical characteristics of patients. The comparisons made between patients treated in the periods between 1981-

1988 and 1989-1997 in relation to the extension of the disease revealed that the average time between the beginning of the synthomes of the disease and the beginning Of the therapy did not change significantly between the beginning of the eighties and the end of the nineties. Levels of prevention

18. The individual has a geniatric resistance but it is possible to strengthen its resistance with the application of the vaccine, nutritional measures, changing unhealthy lifestyles for other healthy and management of the estuary f ©

4. 3. Only if said interval was shortened, additional advances would be obtained to improve the results of the disease. Natural History of Herpes Zosterenferme Infectious, Viral and Acute Which causes painful ampular eruption on the skin.

3. Herpes Zoster

Abel Caicedo

Health and Society

Faculty of Medicine

Universidad Cooperativa de Colombia

August 2010

2.

Strengthen the resistance of the individual: The elderly are at higher risk of acquiring the disease. Primary Prevention

Promotion: Education on the presence of the virus and the care that must be held to reduce the risk factors for reappear.

Protection Specifies: Apply the Visa Varget vaccine Born.

19. Prepatogenic period

4. Asymptomatic

Many virologos consider that Herpes Zoster is a recurrence of chickenpox, that is, by suffering from varicella during the niÁfÁ ' EZ, the infection usually .s .s le ne soÁ±Áad a odibed ,senoiseil sal sadaruc zev anu adatcefa aera le ne rolod led aicnetsisrept(ACITEPREHSOP AIGLARUEN>/ rb/ rb/ rb/ rb/ rb
